

Every installation site is different. To ensure a smooth installation of the ezH2O Liv® water dispenser, please review this checklist and ensure the wall and surrounding space is properly prepped. This checklist is not intended to replace the installation instructions shipped with the product.

Delivery

ezH2O Liv shipping weight: 40 lbs.

ezH2O Liv + chiller shipping weight: 78 lbs.

Space Requirements

Which product do you plan to install?

☐ Water dispenser with filter box

Dimensions: 28"L x 18"W x 5-1/8"D

☐ Water dispenser without filter box (remote filter)

Dimensions: 20"L x 18"W x 5-1/8"D

Note: Filter must be installed within 15 feet of the dispenser.

☐ Remote Chiller (ERS11Y)

Dimensions: 22"L x 19-1/2"W x 7-7/8"D

Note: Chiller must be installed within 15 feet of the dispenser using 3/8" tubing (not included).

Electrical Requirements

Power supply junction box: 115 VAC, 60H

According to most electrical codes, the electrical box cannot be sealed inside a wall cavity with no access to it. If the electrical connection is placed under the water dispenser, a user-supplied removable wall cover will be required to access the junction box.

Water Requirements

Make sure the water valve is 3/8" and the water supply pressure to the water dispenser is between 40 and 105 psi.

Minimum pressure for unit with filter: 40 psi

Optimum pressure: 60 psi

Optimum noise level: Lower than 70 dB

Catch Basin, Drain and P-trap

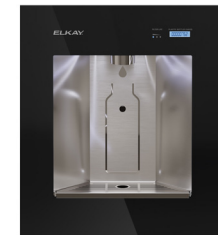

This unit can be connected to either a 1) catch basin or a 2) 1-1/2" drain and 1-1/4" P-trap (not included).

Once installed, complete your fit and finish with drywall and paint.

Unit with filter
box dimensions:
28" x 18" x 5-1/8"

Unit without filter
box dimensions:
20-1/2" x 18" x 5-1/8"

Remote chiller (ERS11Y)

Note: There are different chiller options available for commercial settings. Work with your sales representative to determine the best solution for your needs.
