

Newcastle NB Series Powered Industrial Carts

The workhorse of industrial carts, powering productivity across a wide range of industries

The NB Series is our most popular family of powered carts, with a rugged design that's highly configurable. From warehouse and logistics, to manufacturing, to retail, thousands of NB carts are earning their keep, day in and day out.

A wide range of power systems and accessories ensure that the NB Series brings dramatic efficiency improvements to any legacy process, including those requiring scales, testing equipment, large monitors, printers – even laser printers – and more.

Compact footprint available in both 18" and 24" widths

Lockable, oversize casters for superior mobility and stability

Slot system for quick adjustment and easy customization

Built-in power strip makes it simple to add equipment

Unmatched versatility for optimal efficiency in every application

- + 50% increase in worker productivity
- + 90% reduction in costly labeling errors
- 63% increase in receiving volume
- 4-6 month ROI

Field-adjustable to accommodate every operator

Configurable for any hardware requirements

Robust suite of accessories to suit every application

Ideal for manufacturing, warehouse and logistics, retail – anywhere more efficiency is needed

Industry-leading power systems

Fixed or swappable, lead or lithium, no one offers more advanced power systems than Newcastle. All-day or 24x7 solutions that maximize efficiency, no matter your industry. See details on the next page.

Newcastle NB Series Powered Industrial Carts

Industry-leading power systems

The NB Series has a full suite of masterfully engineered power solutions to choose from. Each one is designed from the ground up to maximize productivity and value. No matter which one you choose, you simply can't go wrong.

TYPICAL USE CASE
(Powering devices 8+ hours)

PowerSwap Nucleus® Classic Solo

Offers the power-to-weight benefits and extreme longevity of lithium iron phosphate technology. Once the battery is depleted, simply swap it with a fully charged one in seconds.

- Swappable and lightweight – batteries weigh just 11 pounds
- Ideal for multiple shifts or 24x7 operation
- 5-7 year/3000 cycle battery life

PowerSwap Nucleus® Classic Dual

Our most popular system, the Classic Dual boasts the same light weight and lithium benefits as the Classic Solo, in a more powerful two-bay system.

- Lightweight and powerful
- Hot-swappable for uninterrupted AC power
- Never lose a terminal session for a battery change

Sealed Lead Acid (SLA)

The original power system designed to handle a full complement of hardware for 8-12 hours or more. At the end of the day, simply plug the cart in to be ready for the next day of work.

- Ideal for heavy-power draw equipment, including industrial laser printers and more

Fixed Lithium

Our first lithium system capable of matching the capacity of our SLA batteries. This system boosts performance and improves mobility while cutting ownership costs.

- Connect it and forget it: 8-10 year battery life
- 1/3 the weight of SLA batteries
- Safe and stable lithium iron phosphate technology
