SAVE FOR CONSUMER

WARNING: Please carefully read and properly follow the instructions for installation found in this manual.

STEPS:

1

Before installation, shut off water supplies, remove old faucet. Remove the nut (4), metal washer (3) and rubber washer (2) from shank (1).

2

Place faucet (1) through the hole in countertop. Secure the faucet (1) to the countertop using the rubber washer (3) and the metal washer (4) provided. Tighten the nut (5), do not overtighten. Then tighten one end of the connector (6) joint at the bottom of the shank (2) and connect the other end to the pipe (7).

3

Connect the end of the hose (2) with the quick connector to the angle valve (1). Push the quick connector with the green tab on the hose (2) firmly upward and attach it to the receiving block with green on the angle connector (1). Pull moderately to ensure the connection has been made. If it is necessary to remove the quick connector, squeeze the tabs on the quick connector and then pull to disconnect. Connect the other end (3) with inlet indicated by the tag of the hose (2) into the end (4) with inlet indicated of the filtration manifold (5). Pull moderately to ensure the connection has been made. Install the filter set (6) onto the filtration manifold (5). After the thread of the filter set (6) is completely screwed into the filtration manifold (5), it cannot be rotated manually.

4

Connect the bottom of pipe (1) into the end (2) with outlet indicated of the filtration manifold (3). Pull moderately to ensure the connection has been made.

5

After installation is completed, turn on water supply, turn the handle in a counterclockwise direction. Flush the water lines for at least one minute. Important: This flushes away any debris that could cause damage to internal parts. Check for leaks.

CARTRIDGE REPLACEMENT

1

Shut off water supply. Remove index (1) and unscrew the set screw (2) on the handle (3). Remove handle (3) and loosen the screw (4) from valve stem. Loosen the inverter (5).

2

Loosen cartridge (1) by turning it counter-clockwise and lift it out. Insert new cartridge. Reinstall the handle.

CARE AND CLEANING INSTRUCTIONS

Congratulations on your purchase of an Elkay product. Although your product is extremely durable, attention should be given to the care, cleaning and maintenance of this product. Cleaning agents and abrasives may cause damage, which may result in oxidation and discoloration.

By following these simple guidelines for proper care and cleaning, it will give you years of enjoyment:

TO CLEAN: Simply wipe gently with a damp cloth and blot dry with a soft towel. A common rule of thumb is: when you dry off, dry off your product.

- Avoid build-up of soap, toothpaste or mineral deposits, as these tend to have an adverse effect on the appearance of the product.
- NEVER use cleaning products of any kind on this product - especially those containing ammonia, bleach or alcohol - or those with any form of abrasive.

FOR CARE AND MAINTENANCE:

- The water in certain areas of the world can be very caustic - standing water around the product can cause damage. Be sure to remove standing water with a dry, soft cloth as soon as possible.
- For polished brass finishes, as often as once a week, you can apply a paste wax or special, non-abrasive, brass coating (DO NOT APPLY POLISH).
- Before applying a protective coating, gently brush the entire fixture using a soft tooth brush. This will remove any dirt or deposit build-up.
- These simple steps will add temporary protective coating to your faucet and extend the life of the finish.

Failure to follow care and cleaning will void your warranty. For additional information, please visit elkayusa.com.
