SUITMATE®
SWIMSUIT WATER EXTRACTOR

Offer the pinnacle of aquatic amenities with the SUITMATE® Swimsuit Water Extractor.

Nearly 40 years ago, we introduced the revolutionary SUITMATE Swimsuit Water Extractor, designed to efficiently remove 95 percent of water from wet swimsuits in just eight seconds.

Today, the SUITMATE unit serves a diverse range of aquatic facilities, from high-end spas and hotels, to fitness clubs and public pools. Constructed from medical-grade, 304 stainless steel, the unit is durable and performs well in high moisture environments. Each unit is manufactured in the USA by Extractor Corporation and includes a high-speed spin process with manual self-start and stop features, allowing for safe operation without heat.

BUILT UPON THE PILLARS OF QUALITY, INTEGRITY, AND CUSTOMER SERVICE

Since our inception, we've remained dedicated to exceeding customer expectations. Every order is handled by our experienced staff committed to understanding the specific needs of your unique facility. We back our product throughout the entire lifecycle, from installation, to maintenance and support.

By delivering a high-quality product coupled with a strong commitment to service integrity, SUITMATE Swimsuit Water Extractor is positioned as the pinnacle of aquatic amenities.

SUITMATE® Swimsuit Water Extractor keeps facilities safe and clean.

Your clients want a safe and simplified departure from your facility. You want an easy-to-maintain facility appointed with modern amenities. The SUITMATE Swimsuit Water Extractor satisfies both desires by getting guests safely on their way while keeping your facility clean.

BENEFITS

- Removes 95% of water from a wet swimsuit in just 8 seconds
- Improves guest experience
- Reduces slip hazards
- Lowers maintenance costs
- Easy installation
- Supported by a dedicated technical team

And with a customer service team dedicated to your needs, your SUITMATE unit is as simple to maintain as it is to use.

FEATURES

- Constructed from 304 medical-grade stainless steel, to withstand high-moisture environments
- Manual self-start and stop via hand pressure on the lid
- Built-in ground fault circuit interrupter (GFCI) or residual current device (RCD)
- Minimal power consumption
- Operates safely without heat
- UL, CUL, CE and UKCA safety certifications
