alrededor del protector

WATERFREE

CARTRIDGE CHANGE CAMBIO DEL CARTUCHO

Patented Technology

Insert key into cartridge.
Insertar la llave en el cartucho.

Turn key to left to unlock.
Girar la llave hacia la izquierda para
destrabar el cartucho.

Lift and tilt cartridge to drain all free liquids.
Levantar e inclinar el cartucho para drenar líquidos.

Place cartridge into bag, tie bag
to seal and dispose.
Colocar el cartucho usado en la
bolsa, sellar y desechar.

Scrub the housing and deep inside of the tailpipe with a
long 1.5-inch diameter nylon brush.
Cepille el contenedor del cartucho, y hacia dentro del tubo
escapeo evecuacion con un cepillo de 1.5 pulgadas de
diámetro con cerdas de nylon.

CAUTION After removing cartridge from
housing, certain naturally occurring but
potentially hazardous sewer gases
may escape through the opening until
re-installed properly. If replacement
cartridge will not be re-installed
immediately, place a rag or paper towels
into opening to block any sewer gases. Remove the paper towels or
rag prior to inserting new cartridge. Alternatively, use Falcon Foam
Housing Cleaner to both clean housing and reduce any outflow
of sewer gases through open housing during cartridge change.
**Never smoke, have an open flame, or place your nose or mouth
near waterless urinal housings into which a cartridge is not
yet properly installed.** You also can wear a breathing mask when
removing or installing any waterless urinal or cartridge to reduce
potential exposure to any such gases.

Flush housing with 5 gallons (20 liters) of hot
soapy water.
Lavar el Contenedor de cartucho con 5 galones o
20 litros de agua caliente jabonosa.

Wipe clean inner stainless
steel rim.
Limpiar la parte interior del
anillo de acero inoxidable.

Insert new cartridge into housing and turn key
to right to lock and click into place.
Poner el nuevo cartucho en el orificio y girar la
llave hacia la derecha para que quede trabado.

Slowly fill cartridge with 1 quart (1 liter) or more of
clean water until there are no air bubbles.
Rellene despacio el cartucho con un litro de agua
limpia hasta que no quede ni aire ni burbujas.

Add blue sealant (allow time to drain
into cartridge).
Añadir el sellador azul (dando tiempo a
que desague en el cartucho).

Spray (mist) cleaner and wipe clean.
Rociar el orinol / urinario / mingitorio
con el líquido limpiador y limpiarlo.

Atención! Una vez sacado el cartucho
del receptáculo, pueden escaparse gases
tóxicos del desagüe hasta que el nuevo
cartucho este instalado. Si no reinstala
el cartucho inmediatamente despues,
bloquee temporalmente el desague para
evitar que los gases se expandan. Cuando
vaya a instalar el nuevo cartucho, saque el bloqueo que utilizo para
evitar la fuga de gases y pase a reinstalar el nuevo cartucho. **Nunca
fume, acerque una llama o se acerque más de lo estrictamente
necesario al desagüe si el cartucho no está instalado.** Se
recomienda usar mascarilla cuando vaya a cambiar un cartucho, así
evitar los gases y los malos olores.
